## Learner Blended Learning Guide

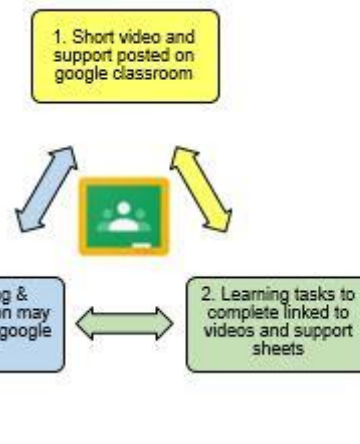

### Efforts to High Things, Ardua ad Alta

#### What is blended learning?

Blended learning is an approach to education that blends or combines online educational materials and opportunities for interaction online with traditional classroom based methods. Blended Learning is not just changing a live lesson in school to a live lesson via google meet. It's about using both in-school and online learning systems to deliver learning and support in order to develop you to be more independent and resilient

Here is the blended learning approach you can expect from your teachers using google classroom. This approach to blended learning will be used if your year group is not able to be in school. If you miss school and the rest of your class is in school, then the resources used in the lesson will be posted on the google classrooms to ensure you don't fall behind.

#### Protocols for Live Support Sessions

	Only use your school login and school google classroom.
	Keep your camera off at all times.
	Keep your microphone off unless your teachers gives you permission to turn it on to speak.
	Use the chat appropriately when your teacher asks you to do so.
	Follow the instructions of your teacher to ensure the live session runs effectively.

**Expectations for behaviour for learning for live support sessions**

We expect the same high standards of behaviour during live support sessions as in "face to face" lessons in school.

- You will be awarded positive and negative behaviours in the same way as if you are in a face to face lesson.
- If you do not have access to online learning, alternative arrangements will be made to ensure you can access the work. **PLEASE LET US KNOW.**
- **All live support sessions will be recorded**
